- Bespoke solutions
- Accident, incident investigation and expert witness

We pride ourselves in being responsive to Clients requirements and a full understanding of the delivery process and cost restraints.

HRM are able to provide a tailored solution to manage these in an integrated way to allow Clients to maximise the opportunities and avoid or mitigate loss.

PROVIDING KEY SERVICES TO A WIDE RANGE OF INDUSTRIES ON A GLOBAL SETTING

“Seamlessly transferring skills from one industry to another”

HRM are a well-established, highly experienced, specialist HSEQ and Technical Safety engineering consultancy delivering a wide range of services and cost-effective solutions for its Clients in the following industries:

Offshore Oil & Gas

Onshore Oil & Gas

Construction

Chemical

Manufacturing

Renewables

Transportation

Utilities

Offshore Oil & Gas Industry

“Providing integrated solutions on a cost-effective basis to Offshore Clients on a Global basis”

A well-established, highly experienced, specialist HSEQ and Technical Safety engineering consultancy working across the Offshore Oil and Gas Industry.

HRM and its Partner companies combine to deliver a wide range of services that delivers responsive and cost-effective solutions for its Clients.

HRM have experience with various facilities such as:

- ✓ Fixed Oil and Gas Production facilities
- ✓ FSO, FPSO and FLNG vessels
- ✓ Subsea facilities and storage
- ✓ Oil and Gas pipeline systems
- ✓ Drilling rigs, drill ships and marine vessels
- ✓ Swamp barge and tender assist vessels
- ✓ Rig Intake to differing regions and countries on a Global basis
- ✓ For further information, listing of Clients and case study examples please request via our contacts page.

Further information and example studies available on request.

Onshore Oil & Gas Industry

“Providing integrated solutions on a cost-effective basis to Onshore Clients on a Global basis”

HRM offer a wide variety of services regarding HSEQ and Technical Safety for the Onshore Petrochemical industry. HRM have an extensive knowledge of European and Worldwide legislation applicable to the industry.

HRM and its Partner companies combine to deliver a wide range of services that delivers responsive and cost-effective solutions for its Clients.

HRM have experience with various facilities such as:

- ✓ Oil Refining facilities and storage
- ✓ Pipelines
- ✓ Terminals
- ✓ LNG and natural processing plants
- ✓ Furnaces, fired heaters and incinerators.

Further information and example studies available on request.

Construction Industry

“Providing key services to all facets of the Construction Industry”

A well-established, highly experienced, specialist HSEQ and CDM consultancy working across the Construction Industry.

HRM and its Partner companies combine to deliver a wide range of services that delivers responsive and cost-effective solutions for its Clients.

HRM have experience with various projects such as:

- ✓ Housing and commercial
- ✓ Groundworks and site layouts
- ✓ Municipal and highways
- ✓ Industrial buildings and structures
- ✓ Oil and Gas facilities (EPIC)
- ✓ Offshore structures and plant (EPC and Hook up)
- ✓ Wind farm (Onshore and Offshore)
- ✓ Waste Treatment plants
- ✓ Water treatment plants
- ✓ Lifting and installation

Further information and example studies available on request.

Chemical Industry

“Providing key services to the Chemical Industries on a Global setting”

HRM have extensive experience in the Chemicals Industry covering Upstream, Midstream and Down Stream operations in the United Kingdom, Europe and on a Global basis.

Our goal is to provide industry with quality chemical and Technical Safety Engineering services, taking due cognisance of advancing and emerging process technologies, and regulatory compliance support to optimise client efficiencies and ensure compliance.

HRM and its Partner companies combine to deliver a wide range of services that delivers responsive and cost-effective solutions for its Clients. HRM have experience with various facilities such as:

- ✓ Chemical and speciality chemical plants
- ✓ Methanol facilities
- ✓ Pipelines
- ✓ Fertiliser
- ✓ Bulk grain
- ✓ Cellulose and Plastics
- ✓ Packaging
- ✓ Paints and coatings
- ✓ Industrial gases
- ✓ Surfactants and fine chemicals
- ✓ Storage facilities and offloading stations

Further information and example studies available on request.

Manufacturing Industry

“Providing integrated solutions on a cost-effective basis to Manufacturing Clients on a Global basis”

A well-established, highly experienced, specialist HSEQ and Technical Safety engineering consultancy working across the Manufacturing Industries.

HRM and its Partner companies combine to deliver a wide range of services that delivers responsive and cost-effective solutions for its Clients.

HRM have experience with various facilities such as:

- ✓ Automotive
- ✓ Household and industrial appliance
- ✓ Animal feeds and storage
- ✓ Metals
- ✓ Precious metals
- ✓ Carbon Fibre, powder and pellets
- ✓ Canning and conveying
- ✓ Plastics and printing
- ✓ Light Engineering
- ✓ Heavy engineering
- ✓ Synthetics and rubber
- ✓ Food processing and packaging
- ✓ Wood mills
- ✓ Fabrics and retail

Further information and example studies available on request.

Renewables Industry

“Services driven by the need to reduce emissions and to develop sustainable sources or renewable energy”

HRM and its Partner companies combine to deliver a wide range of services that delivers responsive and cost-effective solutions for its Clients.

HRM have experience with the various facilities such as:

- ✓ Installation of Offshore Wind Turbines and vessel suitability
- ✓ Installation of Onshore Wind Turbines
- ✓ Geothermal
- ✓ Biomass
- ✓ SRF and RDF pellet plants
- ✓ Met ocean (wind and wave) facilities with our partner company ExCAL Environmental
- ✓ Floating Solar PV farms with our partner company ExCAL Environmental.

Further information and example studies available on request.

Transportation Industry

“Providing integrated solutions on a cost-effective basis to Clients on a Global basis”

A well-established, highly experienced, specialist HSEQ and Technical Safety engineering consultancy working across the Transportation Industry (Rail, Road, Air and Sea).

HRM and its Partner companies combine to deliver a wide range of services that delivers responsive and cost-effective solutions for its Clients.

HRM have experience with the various facilities such as:

- ✓ Rail, Terminals and infrastructure including rolling stock
- ✓ Rail heavy good and material transfer systems
- ✓ Underground transportation
- ✓ Road transportation
- ✓ Highways and roads infrastructure
- ✓ Workshop and maintenance facilities
- ✓ Dangerous goods
- ✓ Airports and aprons
- ✓ Ports and drydocks
- ✓ Marine vessels and Terminals.

Further information and example studies available on request.

Utilities Industry

“Providing key services to the Utilities Industry on a Global setting”

HRM have extensive experience in the Utilities Industry in the United Kingdom, Europe and on a Global basis. Our goal is to provide industry with quality HSEQ, Technical Safety Engineering services, taking due cognisance of advancing and emerging process technologies, and regulatory compliance support to optimise client efficiencies and ensure compliance.

HRM and its Partner companies combine to deliver a wide range of services that delivers responsive and cost-effective solutions for its Clients.

HRM have experience with the various facilities such as:

- ✓ Power generation plants
- ✓ Coal fired power stations
- ✓ Biomass power stations
- ✓ Transmission network
- ✓ Waste facilities (energy generating)
- ✓ Manufacturing plants (incorporating boiler and steam generation)
- ✓ Water facilities
- ✓ Sewage treatment
- ✓ Telecoms
- ✓ Industrial gases.

Further information and example studies available on request.

SEAMLESS SOLUTIONS AND INTEGRATED DELIVERY

“Creating and implementing effective solutions understanding our Clients business and requirements”

WHAT WE DELIVER

Quality and cost-effective solution based services specifically tailored to meet a client’s needs.

With our work being Client led, we ensure from the outset that our scope of work and delivery process is fully in line with expectations and if it is a scope, we cannot address ourselves or with associates then we will not undertake the work.

Our services have a proven track record, and we endeavour to cascade experience from other projects and lessons learnt back into our service profile with the view to improving the overall deliverable and execution process. Much of our work is on an extension or referral basis.

We have the ability to work within a Clients organisation providing either a seconded support function, team lead or a cascade process for deliverable understanding. Such projects have included FEED & Detailed Design, long term study delivery programmes (such as HSE cases and change management) and education packages.

We pride ourselves in being responsive to Clients requirements and a full understanding of the delivery process and cost restraints.

HRM operate within our key 6 service areas:

- ProAct
- TechServe
- Framework
- HSE Health Checker
- Compliance
- Risk ToolKit™

HRM are able to provide a tailored solution to manage these in an integrated way to allow Clients to maximise the opportunities and avoid or mitigate loss.

Comprehensive HSEQ and Training Services

ProAct is a service offered within Hughes Risk Management Limited that can operate on a standalone basis or draw from the expertise provided in the HSE and Technical Consulting service base across a wide range of Industries on a Global footing.

- ✓ Brownfield regeneration support
- ✓ RBI and RBM support packages (linked to our partner companies)
- ✓ Functional Safety assessments, audits and verification (IEC61511)
- ✓ ATEX and DSEAR
- ✓ Due diligence

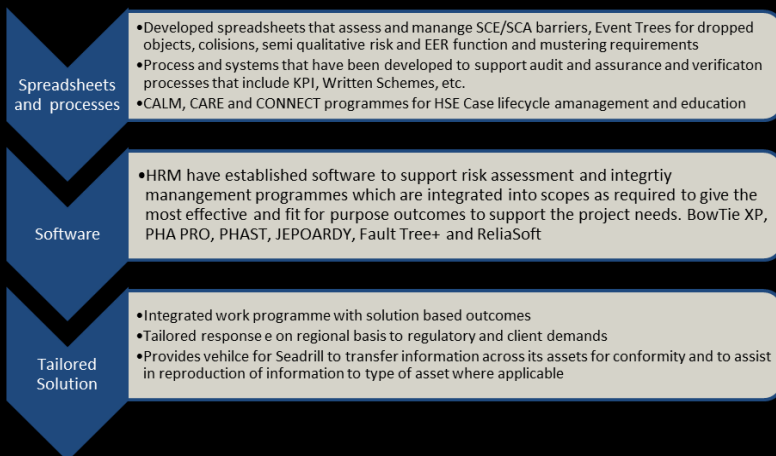

Risk Toolkit

RISK MANAGEMENT

Specialist services and Programmes

Integrated risk model aimed at providing Clients with qualitative, semi quantitative, and quantitative assessments across a wide range of project requirements using Industry validated techniques and models.

An integral part of HRM services is the after care and education of such areas as HSE Cases, SECE/SCA barrier management and Performance Standard assurance. With this in mind and part of the Risk Toolkit™ several programmes have been developed based on experience, compliance and regional challenges.

CALM© - The CALM (Communication And Lifecycle Management) programme is an 8 step process aimed at providing a Client with a compliant HSE Case and a lifecycle programme for its management.

CARE©, (Critical Activities and Response to Emergencies) CARE cards provide responsible persons a card that contains concise information relating to what is deemed a SCA/SECE and their required responsibilities to ensure:

- The critical activity is understood and its place in the risk control or recovery of a MAH
- Requirements to ensure that this SCA/SCE remains functional, available and reliable are defined and clearly understood to ensure that risk control meets the expectation of the established bow tie barriers
- Established responsibilities and requirements for maintenance of SCA/SCE
- Established actions and needs under the emergency response system are linked where appropriate (recovery) and clearly stated by action and responsibility
