

HUGHES

RISK MANAGEMENT LTD

***“Your Partner in Manufacturing
Industry Services”***

Integrated HSE, Technical Safety and Verification specialists

“Trust and Integrity in Client relations”

About Us

Formed in 2007 as a UK Limited Company, HRM has progressively developed into a consultancy that delivers projects for a wide range of clients from its Carlisle based office in the UK.

Our services have a proven track record and we endeavour to cascade experience from other projects and lessons learnt back into our service profile with the view to improving the overall deliverable and execution process. Much of our work is on an extension or referral basis.

HRM provide a range of Consulting and Support services to Clients aimed at providing solution based deliverables providing key decision making tools and processes across industries for all facets of safety and risk management. We can meet your needs in all aspects of:

- Risk Management and Technical Safety
- HSEQ
- Training
- Regulatory submissions
- Integrity and Verification
- Bespoke solutions
- Accident, incident investigation and expert witness

We pride ourselves in being responsive to Clients requirements and a full understanding of the delivery process and cost restraints.

HRM are able to provide a tailored solution to manage these in an integrated way to allow Clients to maximise the opportunities and avoid or mitigate loss.

Further information and example studies available on request.

SEAMLESS SOLUTIONS AND INTEGRATED DELIVERY

“Creating and implementing effective solutions understanding our Clients business and requirements”

WHAT WE DELIVER

Quality and cost-effective solution based services specifically tailored to meet a client’s needs.

With our work being Client led, we ensure from the outset that our scope of work and delivery process is fully in line with expectations and if it is a scope, we cannot address ourselves or with associates then we will not undertake the work.

Our services have a proven track record, and we endeavour to cascade experience from other projects and lessons learnt back into our service profile with the view to improving the overall deliverable and execution process. Much of our work is on an extension or referral basis.

We have the ability to work within a Clients organisation providing either a seconded support function, team lead or a cascade process for deliverable understanding. Such projects have included FEED & Detailed Design, long term study delivery programmes (such as HSE cases and change management) and education packages.

We pride ourselves in being responsive to Clients requirements and a full understanding of the delivery process and cost restraints.

HRM operate within our key 7 service areas:

- ProAct
- TechServe
- Framework
- DrillSafe
- Compliance
- Risk ToolKit™
- HSE Health Checker

HRM are able to provide a tailored solution to manage these in an integrated way to allow Clients to maximise the opportunities and avoid or mitigate loss.

HSE Health Checker

Outsourced support packages, benchmarking and audit programmes

It is a legal requirement in UK Health and Safety Law that all businesses have access to competent Health and Safety advice. At HRM we understand it may not be feasible and cost effective to have a full-time position within your company to address these needs.

For this reason, HRM offer a range of retained Health and Safety services that could fit your business profile. The below are examples of the type of services we can offer for a standard monthly fee however these can be tailored to match the requirements of your business.
